About Us

DietMile provides a wide array of products and services to cater the dietary needs of animals. We assist dairy farmers, horse owner, feed manufacturers and distributors deliver better animal nutrition through state-of-the-art feed, premix product & services and formulation solution. Our purpose is to nourish the nutritional requirement of the animals with best in-class solution. We strive to improve the potential of the animals without compromising their health in order to increase the profitability of farmers. We keep expertise in anticipating definite nutritional needs of animal and fulfilling them with right mix of accessible raw material & commercially products. Organization aims to diminish the cost of maintaining animals by their innovative products and services. Since we have been working in the Animal nutrition industry for the past 32 years, we have combined our expertise with cutting-edge technology and R&D to better serve our customers.

Horse And Bull Supplement

Supplements play a supportive role in enhancing a horse's and Bull's performance by addressing specific nutritional needs or deficiencies that may not be adequately met through their regular diet. Even with a balanced diet, animals may have nutritional gaps due to variations in forage quality, individual needs, or specific deficiencies. Supplements provide essential vitamins, minerals, and nutrients that might be lacking in their diet. Supplements like glucosamine, Phytodroitin, Hyaluronic Acid and Curcumin support joint health, reduce inflammation, and aid in muscle recovery, crucial for animals involved in high-intensity activities such as racing.

CHARGEMILE

Nutrition Solution

Energy & Immune Supplement For Bulls & Horses

5kg Net Weight

3kg Net Weight

Benefit

- Aids in Muscle Building
- Improves Joint Health
- Improves Digestion Process
- Improves Body Shine
- Strengthens Hoof Health
- Enhances Reproductive System & Seman Qyality

Ingredients

Live Yeast, Yeast Metabolite, Vitamin A, Vitamin D3, Vitamin E, Rice Husk, Glucosamine HCL, Phytodroitin, Curcumin, Hyaluronic Acid, Calcium Carbonate, Dicalcium Phosphate, Sodium Chloride, Magnesium Oxide, Potassium carbonate, Choline Chloride, Biotin, Zinc Sulphate, Copper Sulphate, Zinc Methonine, Copper Amino Acid Complex, Soya De Oiled Cake, Stearic Acid, Palmitic Acid, Cobalt Sulphate, Cobalt Amino Acid Complex, Manganese Sulphate, DL-Lysin, DL-Methionine, Manganese Amino Acid Complex, Fat, ascorbic Acid, Calcium Iodate, Mannan Oligosaccharides, Sodium Selenite,Calcium-D-Phantothenate, Cobalamin, Lactic Acid Producing Bacteria, Artificial Sweetner & Flavour.

Suggestive Usage

- 100gm/Day/Animal
- Adjust the dose as per the body weight of the animal
- 3 Scoop Daily
- As directed by the Nutritionist

Use Spoon to Measure 35g

Composition

Fat

Fat is dense source of energy. Further, it plays a vital role in- Improving Endurance and Stamina, Coat Condition and Skin Health, Supports Vitamin Absorption, Calming Effect.

Protein & Amino Acid

Essential for muscle development and repair, protein and amino acid supplements aid in building and maintaining muscle mass, crucial for strength and speed.

Minerals

Minerals play a vital role in maintaining overall health and supporting various physiological functions in horses. The primary function of minerals is to look after Bone & Muscle Health, Electrolyte Balance, Enzyme Function, Immune Function, Nervous System Function and Hormone Regulation. Balancing these minerals in a animal's diet is essential for their overall health, proper growth, soundness, and optimal performance

Vitamins

Vitamin A : Important for vision, immune function, and skin health. It supports the integrity of mucous membranes and aids in growth and reproduction.

Vitamin D : Facilitates the absorption and utilization of calcium and phosphorus, crucial for bone health and proper development. It helps prevent conditions like rickets and supports immune function.

Vitamin E : Acts as an antioxidant, protecting cells from damage caused by free radicals. It supports muscle health, neurological function, and immune response. Horses in intense training or performance may require additional vitamin E to help reduce muscle soreness and aid in muscle recovery.

Vitamin B : B Vitamins Play various roles in metabolism, energy production, and the utilization of carbohydrates, fats, and proteins. They are crucial for maintaining nerve function, red blood cell production, and healthy skin and coat.

Vitamin C : While animals can synthesize vitamin C in their bodies, supplementation may be beneficial during times of stress or illness. It supports the immune system and acts as an antioxidant.

Liver Tonic

Liver tonics are supplements designed to support and enhance the function of the liver, a crucial organ responsible for various metabolic processes in the body. Detoxification, Metabolism, Improvement of Digestive Health are the keyl function of healthy liver. Liver tonics are often used during periods of stress, illness, or when horses undergo intense training or competition.

Digestative Health

Digestive supplements for horses are designed to support and promote the health of the digestive system. The role of digestive supplements is to support Gut Microbiome, Enhance Digestive Processes, Reduce Digestive Disturbances, Improved Nutrient Utilization, Aid During Transition Periods. Digestive supplements can be especially beneficial for digestive issues, those undergoing dietary changes, or animal under stress due to competition, travel, or illness.

Hoof Health

Hoof health nutrients are essential for maintaining the strength, integrity, and overall well-being of a horse's hooves. These nutrients play a crucial role in supporting healthy hoof growth, durability, and resilience. Biotin, a B-vitamin, is known for its role in supporting hoof health. It contributes to the formation of keratin and has been associated with improved hoof quality and growth rate in horses. Zinc: Zinc is an essential mineral that supports the overall health of hooves. It plays a role in keratin synthesis and helps maintain the structural integrity of the hoof horn.

Methionine

This essential amino acid is a building block of hoof proteins and supports the production of cysteine, which is vital for strong, healthy hooves. Copper is another important mineral for hoof health. It assists in the formation and cross-linking of collagen and elastin fibers, contributing to the strength and elasticity of the hoof.

Joint Health

Joint health nutrients are crucial for maintaining the integrity, flexibility, and functionality of a horse's joints. These nutrients play a significant role in supporting joint health, reducing inflammation, and promoting mobility. The key elements that contribute to joint health in horses. Glucosamine is a natural compound found in cartilage. It supports the formation and repair of cartilage, which cushions the joints, and helps maintain joint health and flexibility. Phytodroitin helps in formation of chondroitin sulfate. Chondroitin sulfate is a component of cartilage that helps maintain its elasticity, hydration, and shock-absorbing properties. It supports the structural integrity of joints. Hyaluronic acid is naturally present in joint fluid and cartilage, providing lubrication and shock absorption within the joints. It helps maintain joint mobility and reduce friction between the bones. Curcumin role in joint health is attributed to its anti-inflammatory, pain relief and antioxidant properties.
