DietMile

ONE STOP SOLUTION FOR BALANCE NUTRITION

PRODUCT CATALOG

KNOW US

DietMile provides a wide array of products and services to cater the dietary needs of dairy cattle. We assist dairy farmers, feed manufacturers and distributors deliver better animal nutrition through state-of-the-art feed, premix product & services and formulation solution.

Our purpose is to nourish the nutritional requirement of the animals with best in-class solution at affordable cost. We strive to improve the potential of the animals without compromising their health in order to increase the profitability of farmers. We keep experts in anticipating definite nutritional needs of animal and fulfilling them with right mix of accessible raw material & commercially products. Organization aims to diminish the cost of maintaining animals by their innovative products and services. Since we have been working in the dairy nutrition industry for the past 32 years, we have combined our expertise with cutting-edge technology and R&D to better serve our customers.

VISION

Company aims to lift dairy farmer's profits and enhance the health of cattle. In the process, the company wants to secure itself as a leading producer of animal supplements and feeds.

FEDREQ

Advance Mineral Mixture

- Organic (Chelated) minerals with high Bio availability
- Rumen Protected Vitamins for improved efficiency
- Vanilla Flavor & Added Sweetener for better palatability
- Anticking & Antioxidant added for longer shelf life

FEDREQ: Advance Mineral Mixture

After extensive R&D, the nutritional requirement of cattle were predicted. The premix was formulated based on the outcomes of R&D and regional deficiency. Further, leading-edge technology was used for the manufacturing of the mineral mixture.

PACKAGING: 1kg, 5kg & 20kg

BENEFITS:

- Reduce cost of dairy farming by optimizing production and reducing the cost associated with diseases and fertility
- Improves Milk Yield and fat content with the existing diet
- Immunity booster
- Eliminates repeat breeding
- Improves digestive system

Dose:

- 50gm per cow/Buffalo per day to mixed in feed
- 1kg to be mixed in 100kg feed
- 25-30 gm for heifer & calf

NUTRITIONAL VALUE/KG			
Vita A	850000 I.U	Se	40 mg
Vita D3	100000 I.U.	Cr	40 mg
Vita E	500 I.U.	Ca	230 g
Zn	11000 mg	P	100 g
Mn	4000 mg	Mg	10 g
Cu	3500 mg	S	8 g
Co	230 mg	Beta Carotine	40 mg
I	300 mg	Amino Acid Complex	1500 mg
Fe	1500 mg	Glycine	175 mg

VoFed
Mineral Mixture

Specially formulated for Diet Consisting of Cottonseed Cake

Fortified with 22 gm/day/animal bio available Calcium

To achieve better absorption of the Calcium it has 17500 IU of Vitamin D

Rumen Protected Vitamins for better efficiency

Vanilla Flavor and added Sweetener for better Palatability

VoFed Mineral Mixture:

Unique research based product formulated for diet consisting of cottonseed cake. It increases the availability of cottonseed cake's nutrients while also supplying deficient minerals and vitamins.

PACKAGING: 1kg & 5kg

BENEFITS:

- Reduce cost of milk production
- Improves Milk Yield and fat content with the existing ration
- Immunity booster- Fortified with Selenium and Vitamin AD3E
- 17500IU of Vitamin D per dose
- Eliminates repeat breeding

Dose:

- 75grams per cow/Buffalo per day to mixed in feed
- 1.5-2.5kg to be mixed in 100kg feed
- 30-40 grams for heifer and calf

NUTRITIONAL VALUE/KG			
Vita A	670000 I.U	Se	30 mg
Vita D3	200000 I.U.	Cr	30 mg
Vita E	300 I.U.	Ca	260 g
Zn	9700 mg	P	35000 mg
Mn	3000 mg	S	8 g
Cu	2400 mg	Mg	10 g
Co	200 mg		
I	200mg		
Fe	1500 mg		

FEDREQ-PREMIUM

Mineral Mixture

Positive DCAD product & provides buffer action

Fulfills the macro and micro nutrient requirement of cattle

Methionine and amino acid chelated minerals for better bio availability and immunity

Rumen Protected Vitamins for better efficiency

FEDREQ-PREMIUM: Mineral Mixture

The premium mineral mixture has unique combination of nutrients to cater the special requirement of cattle during stress period. Additionally, it meets the rising needs of high yielding cattle.

PACKAGING: 1kg

BENEFITS:

- Eliminates repeat breeding
- Aids in regulating entrous cycle (heat cycle)
- Reduces the disease's associated after calving
- Aids in maintaining peck milk for longer duration. For every additional liter of peak milk production per cow, you could expect 750-1500 liter more milk per cow over the lactation.
- Improves milk Yield, immunity and digestive system

Dose:

- 100gm per cow/Buffalo per day to mixed in feed
- 2kg to be mixed in 100kg feed

APPLICATION

- Should be used during first 30 days after calving.
- Recommended in repeat breeding cows for 30 days.

NUTRITIONAL VALUE/KG			
Vita A	800000 I.U	Se	35mg
Vita D3	120000 I.U.	Cr	35mg
Vita E	3000 I.U.	Ca	150g
Beta carotene	40mg	P	70g
Biotin	20mg	Mg	50g
Zn	8500mg	Na	40g
Mn	4000mg	K	20g
Cu	1800mg	S	7.5g
Co	180mg	Beta Carotine	40mg
I	160mg	Amino Acid Complex	3000mg
Fe	1300mg	Glycine	300mg

PREGAGRI

Improves Immunity

Novel formula for pregnant animal for improved health and better growth

It activates the mechanism of calcium and phosphorus mobilization after calving

Includes mineral mixture for pregnant cattle with bio available minerals and rumen protected vitamins

Reduced cases of Retention of Placenta (ROP), Mastitis, Dermatitis, Etc.

PREGAGRI:

PregAgri is novel pregnancy therepy with minerals and vitamins.
It aids in improving the health of pregnant animal.

PACKAGING:

100gm & 1kg (pack of 10 X 100gm)

BENEFITS:

- Improves immunity of pregnant animal
- Makes sufficient calcium and phosphorous available during the time of calving (Reduces chances of Hypocalcemia)
- Biotin aids in udder development of pregnant animal
- Reduced cases of Retention of Placenta (ROP), Mastitis, Dermatitis, Etc.
- Helps in smooth calving and healthy calf
- Improves milk yield after calving

Dose:

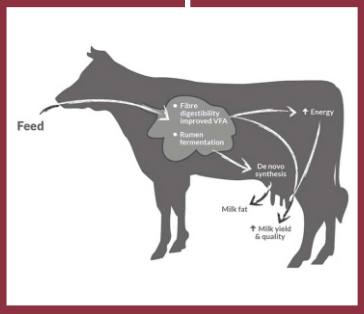
- 100-200 gm/day (1-2 packets daily) Or as Directed By The Veterinarian

APPLICATION

- Use in last 21 days of pregnancy
- Stop using after calving

PH-BUFF

Buffer



Calcareous marine algae-based buffer with live yeast culture

Honeycomb Structure- Provides sustainable action on rumen acid and readily available source of calcium

Other novel Ingredients- Provide instant action on acidity

Yeast: Better fiber digestion, improves count of healthy bacteria, more energy and protein available in existing feed

Fortified with healthy gut bacteria and digestive enzymes

PH-BUFF: Buffer

Special honeycomb structure based buffer for sustainable action on acidity. Further, fortified with yeast, gut bacteria & digestive enzymes to aid in digestive upset.

PACKAGING: 100gm

BENEFITS:

- It possesses a honeycomb structure, providing over ten times the surface area of that from an equivalent weight of limestone. Therefore, the dose requirement is half of that normal buffer.
- Yeast- Live yeast prevented the accumulation of lactate and allowed better fiber digestion by strengthening reducing conditions of ruminal environment.
- Improves fiber digestibility by 11.3%
- Healthy gut bacteria and enzymes improves diet absorbing capacity

Dose:

- Cows-100 gm/cow/day for 3-5 days

APPLICATION

- Summer Acidosis
- Nutrition Acidosis
- While Calving
- Drop in Milk Fat
- Fiber Digestion Problem
- Hindgut Acidosis
- While treating Animals for Fertility or any kind of Disease

VITAMIN BALANCER

Rumen Protected Vitamins for better efficiency

Novel formula of essential vitamin and antioxidant

Helps in well-functioning of immune system to combat diseases

Per dose coat is much lower than the competitor product

VITAMIN BALANCER:

Vitamin Balancer is distinctive blend of essential vitamins. It is perfect substitute for liquid vitamins

PACKAGING: 100gm

APPLICATION

- Use during antibiotic or any other treatment for quick recovery and immunity boosting. Further it restores milk yield after any stress period's like- treatment, lameness, heat stress etc.
- Aids in udder development.
- Recommended to be used before & after vaccination and deworming to achieve better results.
- Stops hair loss and improves body shine.
- Improves chances of pregnancy while insemination and improves fertility of breeding animal.

Dose:

- Adult animal and heifer: 10gram/day for 5 days
- Calf: 2 gram/day

NUTRITIONAL VALUE Per 100gm	
Vita A	1200000 I.U
Vita D3	600000 I.U.
Vita E	5000 I.U.
Biotin	5 mg
Cobalamin (B12)	8 mg
Cr	15 mg
Se	15 mg
Co	65 mg

Per dose cost is lower than the competitor product

STRESSCURE

Betaine decrease the susceptibility of microbes (in rumen) to stress

Restores lost electrolytes in the form of drooling, panting and sweating

Yeast increase the population of healthy microbes in rumen

Chromium and vitamin reduce the impact of stress

B-Complex increases intake and reduces rectal temperature and respiration rate

STRESSCURE:

StressCure is distinct stress relieve solution used for supporting animals in stress. It contains anti-stress nutrients and is capable of providing instant source of energy and electrolyte.

PACKAGING: 500gm

APPLICATION:

- Should be given to animals in heat stress. It will shorten the recovery period and minimize the losses of milk production.
- Will aid in cases of diarrhea to restore the lost electrolyte and further improve the immunity to fight against the pathogen causing diarrhea.
- Use during transport of animals from one to place to another. It will help in maintaining the milk production which usually drops due to stress associated due to transport.
- Works great in severe cases of acidosis.

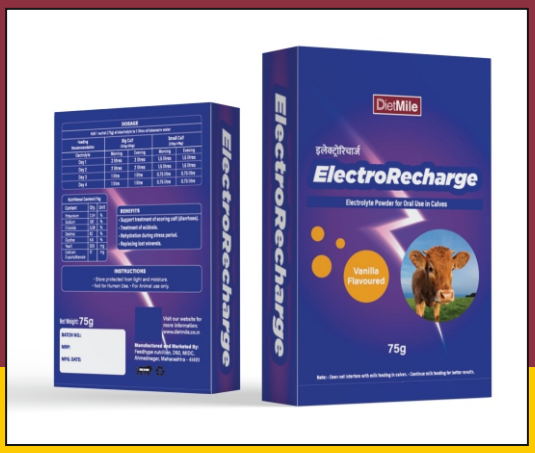
DOSE:

- 100 to 200grams/cow/day for 6 days or as prescribed by the Veterinarian

NUTRITIONAL VALUE Per 500gm			
Micro Nutrient		Macro Nutrient	
Betaine	46 g	K	14.5 g
Biotin	33 mg	Na	50 g
GAA	1500 mg	Mg	22 g
B12	9.5 mg	Cl	30 g
B1	85 mg	Dextrox	150 g
B9	110 mg	Glycine	10 g
B6	60 mg	Yeast	56 billion cfu
B2	32 mg		
Vita C	3600 mg		
Vita A	250000 I.U.		
Vita D3	50000 I.U.		
Vita E	935 I.U.		
Cr	10 mg		
Zn	100 mg		
I	10 mg		
Selenium	5 mg		

ELECTRORECHARGE

Electrolyte Powder for Calf



Support treatment of scoring calf (diarrhea).

Provides essential minerals like sodium, potassium and chloride.

Glycine and Dextrose helps in better absorption of minerals fed.

Provides buffering action.

Yeast helps in restoring healthy bacteria in the gut.

ELECTRORECHARGE: Electrolyte Powder for Calf

As an aid in the treatment and prevention of dehydration, electrolyte imbalance, acidosis and as a supplementary nutrient source for newborn calves with diarrhea.

PACKAGING: 75gm

APPLICATION:

- Should be given as a support to existing diarrhea treatment. It will shorten the recovery period from diarrhea. Better result are observed when calf are given electrolyte at the start of scoring.
- Prevention of dehydration.
- During heat stress it can be given to replace lost electrolyte.
- During the treatment of acidosis.

DOSE:

Add both the sachet (75gram) provided in the box to 2 litres Luke warm water

Feeding Recommendation	Big Calf (35-50kg)		Small Calf (20-34kg)	
Electrolyte	Morning	Evening	Morning	Evening
Day 1	2|	2|	1.5|	1.5|
Day 2	2|	2|	1.5|	1.5|
Day 3	1|	1|	0.75|	0.75|
Day 4	1|	1|	0.75|	0.75|

NUTRITIONAL VALUE Per 75gm		
Content	Qty	Unit
K	2.04	%
Na	7.67	%
Cl	5.59	%
Dextrose	62	%
Glycine	8.6	%
Yeast	200	Million cfu
Calcium D-Pantothenate	12	mg

MASTIRELAX

Avoids damage of teats during mastitis

Shortens the recovery period. This helps in reducing the loss of milk production.

Milk Production is brought to normal at pre-mastitis level.

Farmers are able to reduce the losses associated with the disease- means more profit.

MASTIRELAX:

Mastirelax is research based novel solution formulated for faster recovery of cows in mastitis. It is strengthened with Ayurvedic anti-inflammatory herbs.

PACKAGING:

50gm & 250gm (pack of 5 X 50gm)

APPLICATION:

- Should be given as a support to existing mastitis treatment in case of clinical and subclinical mastitis cases.
- Prevention of mastitis- one day before calving to 4 days in milk
- Should be used for non-infected cows as a prevention technique, when mastitis is detected at the farm

DOSE:

- 1 packet (50 gm) daily for 4-6 days or as per the direction of veterinary

Nutritional value per 50 grams			
Trisodium Citrate	20 g	Vita A	70000 I.U.
Vita C	6 g	Vita D3	21000 I.U.
Live Yeast	30 billion cfu	Vita E	1000 I.U.
Selenium Yeast	1.7 g	Anti-Inflammatory Herbs	3200 mg
Cu	90 mg		
Mn	250 mg		
Zn	620 mg		
Cr	3.5 mg		
CO	6.8 mg		
Iodine	60mg		

DIET-PHOS

Sodium Acid Phosphate

Provides essential nutrient associated with infertility like phosphorus, beta carotene & trace minerals and vitamin

Aids in treating Post parturient Hemoglobinuria by providing bioavailable phosphorus & nutrient required to absorb phosphorus along with copper

Bioavailable source of phosphorus, sodium and iron for treating Pica

DIET-PHOS: Sodium Acid Phosphate

Novel formula of sodium acid phosphate along with trace minerals and vitamins to treat infertility, Post parturient Hemoglobinuria and Pica.

Urine Colour Before Treatment

Urine Colour After Treatment

PACKAGING: 500gm

APPLICATION:

- Infertility
- Post Parturient Hemoglobinuria
- Pica

DOSE & MIXING INSTRUCTION:

- 60-100grams per Cow/Buffalo per day to mixed in feed or as directed by veterinarian

SYMPTOMS:

- Red to coffee colored urine.
- Milk yield is significantly reduced.
- The pulse rate, temperature & respiratory rates are increased in PPH affected animals.
- Pale mucous membrane.
- Pica is often defined as a cow's desire to eat things that do not have any nutritional value. Cows licking and chewing foreign objects such as stones, plastic, and clay etc.
- With the progression of the disease jaundice and weakness may be evident.

SILAGE MILE

Silage Inoculant

- Improves efficiency of silage fermentation
- Reduces dry matter losses in silage
- Improves digestibility of silage
- Reduces silage pH
- Reduces silo temperature
- Maintains the nutritive value of the fodder

SILAGE MILE: Silage Inoculant

Silage inoculant for preserving the nutritive value of fodder

PACKAGING: 100gm

PRODUCT SPECIALTY:

- Combination of homo and hetero fermentative lactic acid producing bacteria
- Inclusion of antifungal to avoid the growth of fungus
- Following the recommendation of application rates, will deliver a minimum of 1,00,000CFU/g of homo and hetero fermentative bacteria on the crop
- Added organic acid for lowering the silage pH to make it less favorable for undesirable bacteria such as Clostridia

DOSE:

- Mix 100g of silage mile powder & 0.5kg of jiggery in 2 liters of water for 15 minutes and spread it uniformly per ton of fodder.

BENEFITS:

- Reduces silage pH
- Improves efficiency of silage fermentation
- Reduces silo temperature
- Reduces dry matter losses in silage
- Improves digestibility of silage
- Maintains the nutritive value of the fodder

CALF MILE

Premix for Calf

Improves average daily gain (Weight of animal)

Boost immunity of calf

Improves body shine

Aids in faster rumen development

CALF MILE: Premix for Calf

Novel formula to aid faster growth and development in calf

PACKAGING: 3KG

PRODUCT SPECIALTY:

- High net energy bypass fat
- Inclusion of bypass protein with complete profile of amino acid
- Bioavailable source of calcium and phosphorus for bones building
- Trace minerals and vitamins for protein & energy synthesis and well-functioning of immune system
- Beta Glucans and live yeast for rumen development and improving digestibility
- Liver tonic enhances liver function and improves digestibility of ration.

COMPOSITION:

- Bypass fat, protein, Minerals, rumen protected vitamins, beta glucans, live yeast and liver tonic

DOSE:

- 50grams/animal/day

BENEFITS:

- Boost immunity of calf
- Improves body shine
- Improves average daily gain (Weight of animal)
- Aids in faster rumen development

CHARGE MILE

Energy & Immune Supplement For Bulls & Horses

Proivides Day Lasting Energy

Improves Digestive System

Boost Immunity of the Animal

Improves Body Shine

FORCE MILE

Energy and immune supplement for Bulls and horses

PACKAGING: 5KG

PRODUCT BENEFIT :

- Improves the Reproductive system and Seman quality
- Improves Hoof Health which inturn improves performace in racing
- Aids in the digestion process
- Enhances the Immune function
- Improves body shine
- Proivides day lasting energy

COMPOSITION:

- Fat, Protein, Minerals, Vitamin, Beta-glucans, Live yeast and Liver tonic

APPLICATION

- As a supplement to raching bulls and horses
- For Breeding bulls and horses
- For better health and digestive systems

SUGGESTIVE USAGE-HORSES/BULL

- 100grams/Day/Animal (3 Spoon Daily)
- Adjust the dose as per the body weight of the animal
- Or as directed by the nutritionist

MYCO-BIND

Broad spectrum toxin binder

Reduces Cases of Infertility

Improves overall health and digestative systems

Enhances Milk Volume & Fat Content

Does Not Bind Vitamins and Trace Minerals

MYCO-BIND Toxin Binder

PACKAGING: 1kg & 5kg

HARMFUL EFFECT OF MYCOTOXIN

- Compromises reproductive performace
- Hormonal Imbalance
- Digestive Disturbances

PRODUCT SPECILITY

- Inhabits further growth of fungas, therby limiting the amount of mycotoxin in the feed
- Physical trapping mechanism based on steric attraction of natural clays
- Inhibites the toxin absortion in the animal body by neutralizing the mycotoxins.
- Yeast cell wall have shown that their tridimensional network were able to chemically adsorb mycotoxins

PRODUCT BENEFIT :

- Reduces cases of infertility
- Improves overall health and digestative systems
- Enhances milk volume and fat content
- Does not bind vitamins and trace minerals

COMPOSITION:

- Natural Clays, Complex carbohydrate, Yeast Cell Wall and Anti-Fungal

SUGGESTIVE USAGEL

- 20-50grams/day/animal
- Or as directed by the nutritionist
